

# SpeechGear Gadget

## Quick Start Guide

Thank you for installing the *SpeechGear Translator*. *Translator* is part of SpeechGear's complete suite of instant translation products. With these products, you can instantly translate conversations, documents, text messages and much more.

Newsletter

**For conversations**, select SpeechGear's *Compadre:Interact™* module and whatever is being said is simultaneously spoken aloud in a second language.

**For documents**, select the *Compadre:Document™* module and with a click of a button your Microsoft Word® file or PowerPoint® presentation is translated and automatically formatted. Use the *Compadre:Visualize™* application to simultaneously display your original document along with your translated versions.

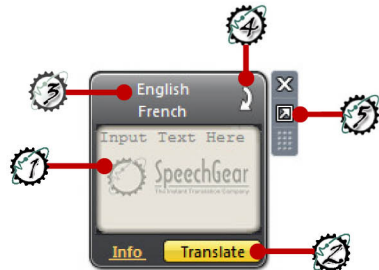

**For customization**, use the *Compadre:Composer™* tools to add your own vocabulary to your translation system. The bottom line is instant translation of whatever you say, hear, read, write or type.

**To install the *SpeechGear Translator***, double click on the SGTranslator icon and select *Install*. That's all it takes. This type of application is called a Gadget, and it appears in the right edge of your computer's display. To view this and the other Gadgets that have been loaded onto your computer, move your cursor to the right edge of your display, right click the mouse, and select "Gadgets" in the pop-up menu.

**To use the translator** you'll need access to the internet, then do the following:

- 1 Type a message into the text box
- 2 Click on the Translate button.
- 3 To change languages click on the language names at the top of the box.
- 4 To switch the direction of the translation, click on the arrow.
- 5 For a Larger Display place your cursor just to the right of the application and select the *Larger Size* option.
