### **MICROPHONE OPTIONS:**

**Thank you** for your purchase of Auditory Sciences' products. We are looking forward to partnering with you in removing communication barriers. We noticed that you did not include any additional microphones with your purchase. For most situations, you will need to use an external microphone with your system. Auditory Sciences offers three types of wireless systems with both headsets and/or handheld microphones, and two types of cabled microphones.

**Complete descriptions of these items** including the prices are provided on the reverse side of this sheet. For additional information just send us an email at [sales@auditorysciences.com](mailto:sales@auditorysciences.com).

**As always, if you have any issues, concerns or questions** please do not hesitate to contact me directly or any member of our team here at Auditory Sciences. Our phone number is 507-645-8924 and our general email address is [support@auditorysciences.com](mailto:support@auditorysciences.com).

Sincerely,  

Robert Palmquist  
*President & CEO, SpeechGear, Inc and Auditory Sciences, LLC.*

Part #	Description	Price
<b>Z.DUAL.KIT</b> 	<b>Dual Wireless Microphone System</b> <p>The Dual microphone kit includes two high-fidelity wireless microphones: a behind-the-neck micro-element headset with a belt-worn transmitter, plus a wireless handheld microphone with a built-in transmitter. Both microphones can be simultaneously connected to your Interact-AS system. The dual-channel receiver comes with a built-in digitizer and analog output ports. The system also includes four complete sets of rechargeable batteries; the recharging system for both microphones; a carrying case; and all required cables and connectors. <u>Additional headsets (Part Z.HS.BH) and wireless handheld microphones (Part Z.DUAL.HH) are available for \$99 each.</u></p>	<b>\$499.00</b>
<b>Z.MICRO.KIT</b> 	<b>Micro Wireless System</b> <p>This high-fidelity Wireless FM system is designed for use in noisy environments where significant background noise may be present. The system includes a storage case with belt loop and carrying strap, a noise canceling microphone headset, a belt-worn Wireless FM transmitter with mute button and clip, a wireless FM receiver, a recharging cable and AC adapter, and a customized cable to connect the wireless receiver to the analog port of your computer. <u>Additional microphone headsets are available for \$49 each (Part Z.MIC.OH).</u></p>	<b>\$449.00</b>
<b>Z.NANO.KIT</b> 	<b>Nano Wireless System</b> <p>The Nano system is extremely small in size, and it is the easiest to use. The receiver is about the size of a USB thumb drive and it has no cables or switches, just plug it into a USB port and your set. The headset is a behind-the-neck style with a micro element. Also included in this system are two complete sets of rechargeable batteries, the recharging system for the batteries, a carrying case, and all required cables and connectors. PLEASE NOTE: Unlike the Dual and Micro systems, the Nano receiver does not have a built-in audio port for connectivity to hearing aids, cochlear implants, or FM/DM transmitters. <u>Additional headsets (Part Z.HS.BH) and a wireless handheld microphone (Part Z.NANO.HH) are available for \$99 each.</u></p>	<b>\$399.00</b>
<b>Z.HH</b> 	<b>Handheld Cabled Microphone with Desktop Stand and USB</b> <p>Use this microphone to support one-to-one conversations such as those with another co-worker or a customer at a reception counter. This package includes the Shure SM-58S handheld microphone with an on/off switch, a black 5' Audio Cable that allows you to plug the microphone directly into the audio port of your computer, a USB sound adapter, a tripod tabletop stand for the microphone, plus a carrying case for your system. The is a very rugged handheld microphone that works well in all situations. It can take a beating, and will keep working.</p>	<b>\$249.00</b>
<b>Z.DESK</b> 	<b>Desktop Cabled USB Microphone</b> <p>Use this microphone to support one-to-one conversations such as those with another co-worker or a customer at a reception counter. This package includes a desktop microphone with an on/off switch and a black 3' USB Cable that allows you to connect the microphone to your computer.</p>	<b>\$249.00</b>
