If you have lost the ability to speak, then the **Interact-AS Voice System™** is your answer. With the Interact-AS Voice System you can once again talk with a grandson, participate in conference room discussions, have a conversation while you are going for a walk with a friend, and hold telephone conversations with friends and family.

Simple to Use Anytime and Anywhere

Unlike whiteboards or pads of paper where others need to read what you write, the Interact System voices aloud your phrases. Simply hold the tablet in one hand and write with the other and whatever you write is voiced aloud. That's all it takes. Your system also features many shortcuts making it easy to enter phrases. This includes Keywords; Favorites Lists; Term Expansion; PhraseBuilding®; Sociable Sounds®; Play back of Pre-recorded Sounds plus the

ability to Record Your own Sounds and have those be voiced out at any time. No system offers the complete communications that come with Interact-AS Voice.

A Complete System

The system starts with Auditory Sciences' award winning Interact-AS Voice software. This is preloaded onto a small yet powerful handheld Windows 7 tablet computer that you can use for everything from surfing the internet to running business applications to taking photos and sharing them with your friends. For "on the go" use a digital pen is included where whatever you write is voiced aloud.

For "at a desk" use, we've included a docking station and a wireless keyboard so whatever you type is voiced aloud.

Plus Instant Closed Captioning and Translation of Languages

If you have difficulty following conversations, add the optional closed-captioning module that instantly transcribes whatever people are saying. Plus, if you are traveling overseas add the optional bi-directional language modules and now whatever you write or type is instantly translated and voiced aloud in your choice of dozens of languages.

Start Interacting Today

Affordable, simple to use, with features to ensure all your communication needs are being met, that's what the Interact-AS Voice System is all about. **Interact-AS Voice meets the guidelines for Medicare and Medical Assistance purchases.** To learn more about the Interact-AS Voice System, visit www.auditorysciences.com, or send an email to info@auditorysciences.com, or we can be reached at 507-645-8924.
