

Interact-Streamer™

Captioning and Translation System

The only product that allows students to fully Interact

Features:

- Easy to use. Simply go to www.streamer.center and login.
- Encrypted website is fully compliant with student privacy and data regulations.
- Runs on most devices including MacBooks, iPads, iPhones, Android Phones, Chromebooks and laptops.
- Spoken words are instantly transcribed using full context.
- Complete punctuation is automatically added.
- Transcript files can be kept for each class and saved as a Word or Google document.
- Teachers can control when the transcript is being generated, who sees that transcript, and who can take a copy home with them.
- Multi-lingual instant voice-to-voice translation of conversations.

Recommended System:

- Any device that uses a browser to connect to the Internet.
- An external microphone is recommended, such as a headset, lapel, tabletop or handheld.

Supporting Success for Children with Hearing Loss

Supporting Students Who Are Hard of Hearing

The Challenge:

Find an effective and affordable approach for supporting students who are Hard of Hearing.

The Answer:

Interact-Streamer™

The good news is that by identifying hearing loss at birth, children who are hard of hearing are often entering school with age-appropriate language skills. However, keeping pace with learning is difficult for these students as they continually miss portions of what their teachers and peers say. A key part of the answer to this challenge is Interact-Streamer™.

How It Works

Interact-Streamer™ is a web-based captioning and translation system that runs on laptops, MacBooks, iPads, iPhones, Android phones, Chromebooks and more. With Streamer™ there are no apps to install or software modules to download, all you do is go to www.streamer.center and login. That's all it takes to start captioning.

Configuration Options

Typically the student has a tablet on their desk that is connected to the Streamer webpage and to a wireless microphone that the teacher is wearing. The student views the captioning, saves the transcript, and then carries the tablet to the next class. Alternatively, you can equip each classroom in your school with a captioning system. Streamer™ can be directly integrated into any existing classroom amplification system. This way a single Streamer subscription can be used to support an entire classroom of students.

Removing Language Barriers

With your Streamer™ subscription you can have as many User Accounts as you like. If you're working with parents or a group of students that prefer communicating using another language, create a separate account for them. Anything you say in English is displayed and spoken aloud in their language, and anything they say is displayed and spoken in English. You can have dozens of students in a classroom where each person speaks a different language, and with Streamer™ whatever anyone says or types is automatically translated and spoken aloud (using an earbud) in each individual's preferred language.

Budget Friendly

Interact-Streamer costs around 1/100th the amount of traditional approaches like CART. With Interact-Streamer there are no per-minute or per-session fees.

Start Interacting Today

Affordable, simple to use, and effective – welcome to Interact-Streamer. Streamer is available as a single, a multi-room, or a school-wide subscription. To learn more or to sign up for a 30-day trial, give us a call, send an email, or visit our website. We'll be glad to help you and your students start Interacting the right way, right away.
