Instant Spoken Translation of Your Phrases

The *Communicator* system combines SpeechGear's *Interpreter* software with a ruggedized computer to provide instant spoken translation in a pocketsize system. Simply speak, type, write or use *Communicator's* touchscreen to select the words or phrases you want to translate. With *Communicator* you both see and hear the translation. It's that simple, instant spoken translation.
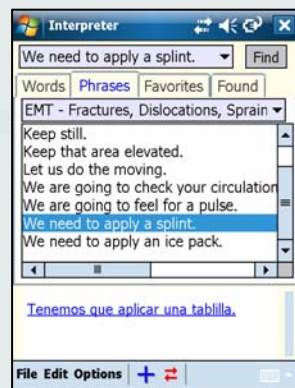

Easy to Use

Other systems require you to navigate through multiple menus and scroll through long lists to try to find the phrase you want. *Communicator* makes it easy. *Communicator's* dictionary and phrases are all part of the same interface. Plus, you can easily create your own Favorites Lists for quick recall of phrases that you frequently use. Want more? *Communicator* remembers the most recent 20 phrases that you've translated, allowing easy reuse. Even more? Use the powerful *Find* features to locate phrases that you want to translate. It all adds up to a powerful, flexible, yet easy-to-use, pocketable system.

Say What You Want to Say in Any Language

With *Communicator,* you will no longer be frustrated by being forced to only use a fixed set of phrases that are hard to locate and difficult to remember. Instead, *Communicator's* PhraseBuilder™ technology lets you say exactly what you want to say. With a single click the phrase, *Do you need some ____?,* becomes *Do you need some <u>food</u>?* or *Do you need some <u>assistance</u>?* You can also insert words from *Communicator's* dictionary directly into your phrases. For example, you can enter a word into the phrase, *Are you allergic to _____.* Further, with *Communicator* you can choose to use audio recorded by a native speaker or have *Communicator* automatically generate the speech. You can even use *ComposerEditor* to add your own new words, phrases and categories, The flexibility is designed into *Communicator* so it adapts to how you want to communicate, instead of the other way around.

Package Options

Communicator comes standard with words and phrases for general conversation (49 categories). Additional packages, such as emergency medical situations (24 categories) and military specific applications (17 categories) are available. Combine your system with *Composer*, and you can easily create your own words, categories and phrases and share these with other users. The *Communicator* system includes a speaker loud enough to be heard in most settings. For extremely noisy situations, or where crowd control is an issue, SpeechGear offers an optional bull-horn speaker.

Try it today !!!

Communicator is part of SpeechGear's entire suite of instant translation products.
