## Removing the Language Barriers with your Partners

In today's world, commerce is conducted globally. Goods are manufactured overseas, products are sold internationally, and partnerships are formed with firms and individuals on a world-wide basis. Overcoming the language barriers encountered in conducting international business is vital, and up until now is expensive both in terms of cost and schedule. Subscribing to translation services or hiring full-time interpreters is beyond the means of many budgets with the translations often introducing delays in negotiations. To meet this challenge with an affordable and effective solution, SpeechGear has worked in partnership with the U.S. Government to develop a complete suite of instant translation products that are now available for removing these language barriers. SpeechGear's products are affordable, effective, and immediately available.

## Reduce Operational Costs

SpeechGear's products do not completely replace trained interpreters. With SpeechGear, your interpreters can focus their efforts on situations where they are truly needed, resulting in more effective and efficient use of their valuable time. Instead of using expensive translation services or trying to rely on in-house interpreters for all situations; SpeechGear reduces operational costs by providing you with an affordable instant translation product that you own and can use as the situation dictates. This is not a service or a subscription plan. Use SpeechGear's products as often as needed with no additional usage fees being incurred.

## Four Steps to Removing the Language Barrier

- 1 Conversations:** Use *Interact* to instantly translate conversations. Simply say a phrase, and it is translated and spoken in the desired foreign language. With *Interact*, you can have a personal and direct conversation with your partners instead of always using a formalized setting where professional interpreters are being used. Plus, with *Interact* a transcript of your entire conversation is automatically generated and can be saved for future reference.
- 2 Documentation:** Use *Document* to instantly translate Microsoft Office® files such as Word documents and Excel spreadsheets. With *Document*, the translation automatically retains the same formatting as the original. There's no need to cut-and-paste as with other translation programs. *Document* even provides tools for scaling fonts so that a one-page document remains a one-page document when it is translated. Whether you want to simply send a quick note to a partner that is written in the partner's language, or you need to translate pages of text, *Document* is your answer.
- 3 Presentations:** *Document* also instantly translates PowerPoint® presentations while again, automatically retaining the formatting of your original document. If there's a picture in the original, it will also be there in the translation. If the original document has bold and underlined text written in red, the translation will have this same formatting. Once you're ready to show your presentation, use *DocumentViewer* to simultaneously display the original file along with your translated versions all on a single projector.
- 4 Language Learning:** It's always nice to know a bit of a foreign language, perhaps at least enough to say hello. With *Interact*, you learn the vocabulary you need to know, versus other language learning programs where you memorize phrases and words in a set order that someone else has selected for you. This immediate application of needed vocabulary allows you to quickly learn a second language.

## Configure Your System Today

With SpeechGear, now you can directly communicate with your international partners. SpeechGear also has a line of products enabling you to communicate with individuals who are deaf or hard of hearing. To configure and order your Compadre system, send an email to [info@speechgear.com](mailto:info@speechgear.com), or give us a call at 888-664-9123, or visit our website at [www.speechgear.com](http://www.speechgear.com).
