Mobile Computing Solutions Custom Built for You

The Endurance Tablet PC is a portable computing system that meets the demands of even the most versatile users. Using Microsoft's Windows Tablet XP Operating System and SpeechGear's patented all-weather pen and voice-based interface, the Endurance combines the performance of a desktop with the convenience of a powerful mobile platform. From outdoors in all weather conditions, to the office where more resource-intensive applications are required, the Endurance Tablet PC is your solution.

A System that Can Keep Up with Your Lifestyle

Readable: Tired of having computer screens that wash out in bright sunlight, or ones designed for the outdoors that cannot be read inside? The Endurance's 9" display with 1024 x 600 resolution is both transmissive and reflective, making it viewable in all lighting conditions, from bright sunlight to no light.

Mobile: Need a reliable speech interface that doesn't require you to wear a headset? The Endurance comes standard with a multi-element noise-canceling directional microphone array and a four speaker audio system to produce audio output that can be easily understood even in noisy environments.

Durable: The Endurance Tablet PC is designed to handle all the rain, dust, mud, bumps and drops that happen when working outdoors. This includes a fanless design, so there are no concerns about using the system in extreme environments. When you move inside, plug the Endurance into your dock and you have a desktop system ready to handle all your computing needs.

Secure: If maintaining absolute data security among multiple users is an issue, the Endurance is your answer. With the Endurance you can pull the Hard Drive without any tools. At the end of the day, you can take your data with you.

Design Your System Today

The Endurance Tablet PC is designed to work on your terms, not the other way around. With SpeechGear's modular design, you select the processor, amount of memory, disk space and connectivity that you want for your system.

First, select the processor that meets your cost and performance needs. No matter what configuration you choose, you can easily upgrade your Endurance as new processors become available.

Next, select your optimum memory solution choosing from a variety of RAM, Flash Drive or Hard Drive options.

Need more? With Endurance you select the connectivity and I/O. The Endurance comes preconfigured with a pen-based digitizer, two USB 2.0 ports, embedded 802.11 wireless and a PC Card Interface. Additional I/O options include an embedded camera, Bluetooth wireless, GPS, up to four USB 2.0 ports, adapters for Smart Media SD Memory Stick, Memory Stick Pro, XD Picture, Multimedia and Compact Flash cards, connectors for serial, CRT, 100MB Ethernet, analog microphone input, stereo audio output, and PS/2 mouse and PS/2 keyboard interfaces plus the keyboard itself.
