

Interact-AS™

One of the many products designed by Auditory Sciences for the hard of hearing and deaf communities.

There are many products available for the deaf and hard of hearing communities, but only one that allows you to truly *interact*.

Features:

- Supports written, typed and spoken input.
- Spoken words are instantly transcribed and displayed.
- Written or typed words are instantly spoken.
- Available in multiple languages including American and British English, European and Latin American Spanish, European and Canadian French, Italian, German, Dutch, Arabic, plus many more...
- Purchase *Interact-AS's* language translation modules to directly communicate in foreign languages.
- Use the "Visualize" feature as a sketch pad or to display and notate pictures and videos.
- Include a camera on your system to view live video of the person who is speaking.
- Save a transcript of your conversation for future reference.
- Run *Interact-AS* on your PC or purchase an already configured system.

After 125 Years, the Wait is Over

In 1883, the editor of the American Annals of the Deaf wrote, "it is not unreasonable to hope that some instrument will yet be contrived that will transcribe ordinary human utterance." After a wait of 125 years, what was once a dream is now available product. With *Interact-AS*, individuals who are deaf can now directly communicate with people who do not know sign language.

Simple to Use...

With *Interact-AS* it's simple, spoken words are instantly displayed, and whatever you type or write is spoken out loud. Load *Interact-AS* onto your own computer or select one of Auditory Sciences' pre-configured Tablet PCs, and you're ready to go. You no longer need to find a desk to place a computer so you can start typing, or rely on pads of paper. Simply hold the tablet in one hand, and write with the other. Use *Interact-AS* wherever you go: at work, in stores, at the bank, in restaurants – instant communication anywhere, anytime with anyone.

... With Advanced Features

You've perhaps heard the saying, "a picture is worth a thousand words." *Interact-AS* puts this into practice. Use the *Visualize* tab to show pictures or video clips that augment your communications – perhaps a school assignment, a website, a work document, or a city map. Pull up a sketch pad where you can draw and discuss ideas. *Visualize* is just one of *Interact's* many features. Others include:

- View a live video image of the person who is speaking,
- Select the gender of the voice output you want to use,
- Save the transcript of your conversation for future reference,
- Add your own unique terms and vocabulary to the system,
- And many more ...

Plus Instant Translation of Foreign Languages

Interact-AS even instantly translates foreign languages. Write or type any phrase in English, it's immediately translated and voiced out in Spanish, French, Arabic, Chinese, Portuguese, German, Italian or many other languages. Say something in a foreign language and it's translated and shown to you in English. Only *Interact-AS* allows you to communicate with others in so many multiple languages.

Start Interacting Today

Affordable, simple to use, with features to ensure all your communication needs are being met, that's what *Interact-AS* is all about. *Interact-AS* runs on almost any PC that is running Microsoft's XP, Vista or Windows 7 Operating System. Purchase the software and load it on your own computer, or select one of Auditory Science's pre-configured tablet PCs that are optimized for your use. To learn more about *Interact-AS*, visit our website at www.auditorysciences.com, or send an email to info@auditorysciences.com, or give us a call at 507-645-8924.
