

# Interact™

Part of SpeechGear's *Compadre™* suite of instant language translation solutions found at [www.speechgear.com](http://www.speechgear.com).

There are many translation products, but only one that allows you to truly *interact*.

## Features:

- Instant bi-directional translation of whatever you say, write or type.
- Automatic generation of transcriptions of your conversations.
- Multiple playback capabilities including male and female voice output.
- Headset compatibility enables hands-free and eyes-free operations.
- Continuous repeat mode for use in crowd control situations.
- Visualize feature allows you to display and notate pictures, forms and videos, further improving your ability to Interact.

## Instant Translation of Conversations

Speak to the system, it repeats what you said in a different language and at the same time generates a complete transcript of the conversation. No human interpreter, no dictionaries, no memorizing of pre-recorded phrases, no constraining your speech to a limited domain, no expensive translation services; just real-time speech-to-speech translation of conversations.

## Say What You Want to Say

Other voice-based translators require you to speak a fixed set of phrases or limit your speech to a constrained domain. This method works fine if you don't need to translate more than you can memorize **and** as long as someone else has anticipated what you need to say. SpeechGear understands that communication is often unpredictable and that such limitations are unacceptable in real situations. With *Interact* there are no boundaries, no constraints, no limited number of phrases. You can even easily add your own vocabulary such as acronyms or proper nouns. Instead of adapting your communications to what the system supports, *Interact* adapts to you.

## A Picture is Worth a Thousand Words

Often communication is more than simply speaking. *Interact* includes a *Visualize* feature that allows you to enhance your communications by using images such as maps and calendars; pictures such as people and items of interest; forms for individuals to read or fill out, and/or videos demonstrating a task the individual should perform. With *Visualize*, you can go beyond simply speaking to truly communicating.

## Hands and Eyes Free Interface

In many situations you need to keep your hands free to perform other tasks – perhaps you are showing a customer how to use a product, helping a student complete an assignment, providing medical care to a patient, or working on a manufacturing line. Once again, *Interact* is your solution. *Interact* includes a complete hands and eyes free interface where voice-commands and audio cues are all that is needed to instantly translate conversations.

## Start Interacting Today

To learn more about *Interact* and SpeechGear's entire line of instant translation products, send an email to [info@speechgear.com](mailto:info@speechgear.com), or give us a call at 888-664-9123 and ask for the Sales Department, or visit our website at [www.speechgear.com](http://www.speechgear.com). We are looking forward to working with you to configure an instant translation system specifically for your needs.
