

# Languages Supported

SpeechGear's products are being used to remove communications barriers throughout the world.

Each of the following pages lists the languages that we currently support for that product. If there's a language you need that's not on our list, let us know by sending an email to [info@speechgear.com](mailto:info@speechgear.com).

## Notes for Compadre:Interact

### All Language Pairs:

Compadre:Interact provides bi-directional instant translation for the given language pair. In choosing a language pair, you must specify whether American or British English will be used. As a specific example, [American English <> Arabic] is a separate language pair from that of [British English <> Arabic]. The following notations detail the capabilities for the specific language pair that is of interest.

1. Denotes complete bi-directional language pair. The module includes speech recognition, typing, handwriting recognition (requires a tablet or slate PC) and voice synthesis for both languages. The module supports the following translation modes going from English to the second language as well as from the second language into English:
  - speech-to-speech
  - speech-to-text
  - typing-to-speech
  - typing-to-text
  - handwriting-to-speech
  - handwriting-to-text
2. This bi-directional language module includes speech recognition, typing, handwriting recognition and voice synthesis for English; and typing, handwriting recognition and voice synthesis for the second language.
3. This bi-directional language module includes speech recognition, typing, handwriting recognition and voice synthesis for English; and typing for the second language.

## Notes for Compadre:Document

### All Language Pairs:

Compadre:Document provides bi-directional text-to-text translation for the given language pair. The Compadre:Document module has two interface modes: (1) an add-in that resides directly in your Microsoft Office application, and (2) a standalone DocumentWorkbench interface.

1. Handwriting recognition is supported for English for all language pairs, and also supported for the second language in these language pairs.

**Interpreter supports bi-directional translation between any of the following language pairs:**

American English <> Modern Standard Arabic

American English <> Iraqi-Dialect Arabic

American English <> Mandarin Chinese

American English <> Dutch

American English <> French

American English <> German

American English <> Korean

American English <> Brazilian Portuguese

American English <> European Portuguese

American English <> Russian

American English <> Mexican Spanish

American English <> European Spanish

American English <> Latin American Spanish
